Water Main Break Under Jail Leads to Special Measures

Crestview – A water main break under the Okaloosa County Jail has halted the flow of water to the facility from the county. Jail administrators and staff have begun to distribute clean drinking water to inmates and instituted manual flushes for the toilets in the jail. The break is under Charlie, Delta and Echo holding pods in the jail.

County maintenance has responded to the water main break and is working diligently to fix the problem. They have dug out the broken pipe out and are repairing it now. We believe the jail should have water restored soon. County public information will continue to give updates on the situation as they are available.
